

The 'Push.To.Fit' System

▼ Contains Gripflex™ technology that holds inserts tightly in place.

Simply 'Push To Fit' the graphic panels or accessories into the Gripflex™ slot. Image-N gives incredible flexibility to change or enhance display.

Flattened oval extrusion section 34mm x 24mm with two gripflex™ slots and produced with one M8 and one M4 internal boss for fitting base plate or accessories. Slots accept 3mm panels.

Image-N42 can be used in a huge number of applications both in window displays and in-store. It can be made into a free standing floor or counter display, or wall mounted, fitted floor to ceiling or ceiling hung.

Standard fixing display accessories are available for you to use as required, see our website www.tagisystems.co.uk

Accessories N42

As the panels push into the slot there is no need for additional fixing components, this gives Image-N units a clean and uncluttered appearance. This also means the system is easy to change or enhance to create more impact.

The 'Push.To.Fit' System

Just push into the slot to fit, it couldn't be easier.

Applications + Uses

- Product Displays
- Announcement Boards
- Floor Directories
- Area Identification
- Menu Display
- Banner Display
- Counter Top Display
- Window Display
- Poster Display
- Directional Signs
- Literature Holders
- Digital Screen Holders
- Signs
- Point-Of-Sale

Because panels only need to be held at one side they can be angled to give more impact.

System Costs

Image-N is surprisingly affordable because costly accessory fittings are not required.

Should you require a specialised display, Tagi's design team can produce a custom design to meet your specific needs.
